Press Release

Mozambique LNG holds Speed Meeting in Pemba with more than 100 Mozambican companies

Maputo, November 10, 2026 – The Mozambique LNG project, operated by TotalEnergies EP Mozambique Area 1 Limitada (TEPMA1), held a Speed Meeting today in Pemba, bringing together more than 100 Mozambican companies.

The Speed Meeting provided participating companies with an opportunity to engage directly with the Mozambique LNG project's procurement teams, clarify questions regarding contracting processes, and obtain information on current and upcoming supply opportunities.

Edna Simbine, Local Content Manager at TEPMA1, stated: *"For more Mozambican companies to benefit from the opportunities associated with Mozambique LNG, it is important that they understand the Project's requirements and are prepared to respond competitively. Speed Meetings contribute to this objective by bringing suppliers and procurement teams closer together. This is one of the initiatives through which Mozambique LNG promotes local content and supports the development of national suppliers."*

This Speed Meeting in Pemba forms part of the broader set of initiatives promoted by Mozambique LNG to support local content development and strengthen the participation of Mozambican companies in the Project's value chain. The initiative follows the Speed Meeting held in Maputo last week, which brought together more than 200 Mozambican companies, and also builds on the business seminars conducted earlier this year in Palma, Pemba and Maputo, which gathered around 500 businesspeople

and representatives of local business associations to present contracting opportunities and information on the Project's procurement processes.

The development of local suppliers remains a strategic priority for Mozambique LNG, which plans to invest approximately US$4.5 billion in contracts with Mozambican companies during the construction phase.

About Mozambique LNG project

Mozambique LNG is the first onshore development of a liquefied natural gas (LNG) plant in the country. The project includes the development of the Golfinho and Atum fields located within Offshore Area 1 and the construction of a two-trains liquefaction plant with a capacity of 13.12 million tonnes per year. The Area 1 contains approximately up to 65 Tcf of gas resources, of which 18 Tcf will be developed with the first two trains.

TotalEnergies EP Mozambique Area 1 Limitada, a wholly owned subsidiary of TotalEnergies SE, operates the Mozambique LNG project with a 26.5% stake, together with Mitsui E&P Mozambique Area1 Limited (20%), ENH Rovuma Área 1, SA (15%), ONGC Videsh Rovuma Limited (10%), Beas Rovuma Energy Mozambique Limited (10%), BPRL Ventures Mozambique BV (10%), and PTTEP Mozambique Area 1 Limited (8.5%).

About TotalEnergies

TotalEnergies is a global integrated energy company that produces and markets energies: oil and biofuels, natural gas, biogas and low-carbon hydrogen, renewables and electricity. Our more than 100,000 employees are committed to provide as many people as possible with energy that is more reliable, more affordable and more sustainable. Active in about 120 countries, TotalEnergies places sustainability at the heart of its strategy, its projects and its operations.
